KANSAS

## Two Open Faculty Searches

### Tenure-Track Assistant Professor

We welcome applications from candidates with expertise in either experimental or computational research that will complement the department and university's current strengths in areas of energy & sustainable environmental technologies and/or biotechnology. Candidates who can strengthen existing research programs and centers in biomaterials, biotechnology, catalysis, energy and sustainability or process systems engineering are especially encouraged to apply.

The University of Kansas values diversity, equity, inclusion and accessibility. In its continuing effort to enrich its academic environment and provide equal educational and employment opportunities, the university encourages applications from members of underrepresented groups. In Spring 2019, the KU SoE was one of only 29 universities to receive an inaugural ASEE Diversity Recognition Award. Founded in 1865, the University of Kansas is the state's flagship university, an R-1 institution and one of just 66 invited members of the prestigious Association of American Universities (AAU).
